Progressing urban regeneration rather than expanding into green spaces

Strategy

Ábhair: Compact
City

In order to develop a compact city as described in your strategic objectives, priority should be given to increasing occupation of the city centre. There is very little Tier 1 space designated on the map yet there seems to be a huge amount of brownfield sites when you walk around the city.

A vacant sites officer should be appointed as soon as possible and residency rates in the city centre increased. This also means you will have to put amenities for these new residents in - including green spaces.
