Draft Cork City Development Plan 2022-2028

Targets/accountability/measurement

Caibidil: Volume 1 - Written Statement» 1.
Introduction

The Development Plan is full of wonderful ideas and plans, but very short on actual timed, measurable targets or accountability. Comparing this plan to previous plans, many things have been planned before and not realised (eg cycle path and upper glen park, map 4).

It isn't enough really, to say we will create a 15 minute city without giving some indication as to how you will know whether you've achieved it or not. And in fact, how the general population should know whether it has been achieved.

For future plans it would be useful if there were timed outcomes that could be reported back rather than realising in 2028 that targets have been missed, and infrastructure has been put in place outside of the scope of the strategic goals.
